YEAR 1915 WAS "TYPHUS YEAR"

Dr. C. C. Pierce Tells Arizona Physicians 250,000 Cases in Mexico.

Phoenix, Ariz., April 28.—A paper on "Prevention of Typhus Fever," by Dr. C. C. Pierce, senior surgeon of the United States public health service, stationed at El Paso, was the feature of the annual convention of the Arizona State Medical association, held in Phoenix.

The year 1915 was "typhus year," said Dr. Pierce. "More cases occurred during that 12 months than ever before since diseases have been accurately diagnosed. This was due to the great war in Europe, giving rise to the conditions favorable for the spread of typhus, and to the miserable conditions in Mexico."

Probably 250,000 cases in Mexico. "In Europe there were probably half a million cases in Serbia alone, with 150,000 deaths. In Mexico no one knows how many cases there were during the year 1915 and the first four months of 1916, but I believe that 250,000 cases for the entire republic is not an excessive estimate."

No evidence has ever been discovered to show that typhus is spread except through the agency of lice, according to Dr. Pierce.

Dr. Hugh Crouse, of El Paso, lectured to the association on flatfoot and other tarsal faults.

FIRE TRACK SIDE SWIPES JITNE

Wheel of Hook and Ladder Truck Tore Off; Jitne Bus Overturns.

"Gravest curve," at the intersection of Stanton, San Antonio and Myrtle avenues, came near claiming a victim Friday morning when the big hook and ladder fire truck wrenched a wheel off on the car truck, swung around across the street, hit a Valverde jitne and overturned it.

The accident occurred at 10:20 when the fire department made a run to 267 Texas street, where a small fire in a restaurant caused an alarm. The horse drawn truck rolled along on the car track from Overland to San Antonio with the three big horses plunging forward in approval of the fire fighting style. As driver, Charles Stewart swung his team to the right to make the "S" turn into North Stanton street, the rear wheels remained locked on the car rails and the left hind wheel was dashed and collapsed.

Tillerman C. Ithodes, who was at the rear wheel of the long ladder truck, clung to the wheel and attempted to steer but it swung clear of the track and went in a great arc across the street intersection, crashing into the Valverde jitne which was standing at the crossing waiting for the fire department to pass. The Ford car was overturned and the driver thrown out but was only slightly injured. The windshield of the jitne was smashed and the top broken.

A crowd rushed to the car, expecting to find the driver dead among the broken glass and smashed automobile. But the driver freed himself, turned his car back on its wheels and drove off before the officers could obtain his name. He clung to the wheel of the truck, clung to it desperately and escaped without injury.

The fire was caused by the explosion of a gas meter in the "Spot" restaurant, at 267 Texas street. The woodwork around the meter was burned and the window was broken by the heat from the fire. The damage amounted to \$25.

MARKET MASS MEETING OFF

J. M. Wyatt Announces Municipal Market Will Be Built by New Company.

A municipal market is to be built and the mass meeting, which was to have been held at the chamber of commerce tonight, has been called off.

This was announced following a meeting of the chamber of commerce directors Friday morning. The market meeting was called by president H. B. Orndorff, to discuss plans for getting a municipal market here as R. M. At the meeting Friday morning J. M. Wyatt, a director of the chamber of commerce, announced that a new company has been organized and that contracts for building the market will be let this evening. This market will be operated under municipal control, it was announced at the meeting, the same as the Dudley market was to have been.

As the purpose of the mass meeting tonight was to consider plans for getting the market built, it was declared unnecessary to hold the meeting and it was cancelled by the officers of the chamber of commerce.
